Lua: An Industry Standard

Other Languages → Lua

```
if (!carMoving) {  
    // do something  
} else if (noGas) {  
    // something else  
}
```

```
for (i=1; i<=10; i++) {  
    print(i)  
}
```

```
for (j=100; j>0; j--) {  
    print(j)  
}
```

```
if (not carMoving) then  
    -- do something  
elseif (noGas) then  
    -- something else  
end
```

```
for i = 1,10 do  
    print(i)  
end
```

```
for j = 100,1,-1 do  
    print(j)  
end
```

Lua Objects are Tables

```
myTable = { "a", "b", 100, "hello" }
```

```
otherTable = { x=5, y=7, name="Joe" }
```

```
newTable = {}
```

```
newTable[1] = "a"
```

```
newTable.x = 5
```

```
newTable.hasProperties = true
```

```
newTable["name"] = "Joe"
```

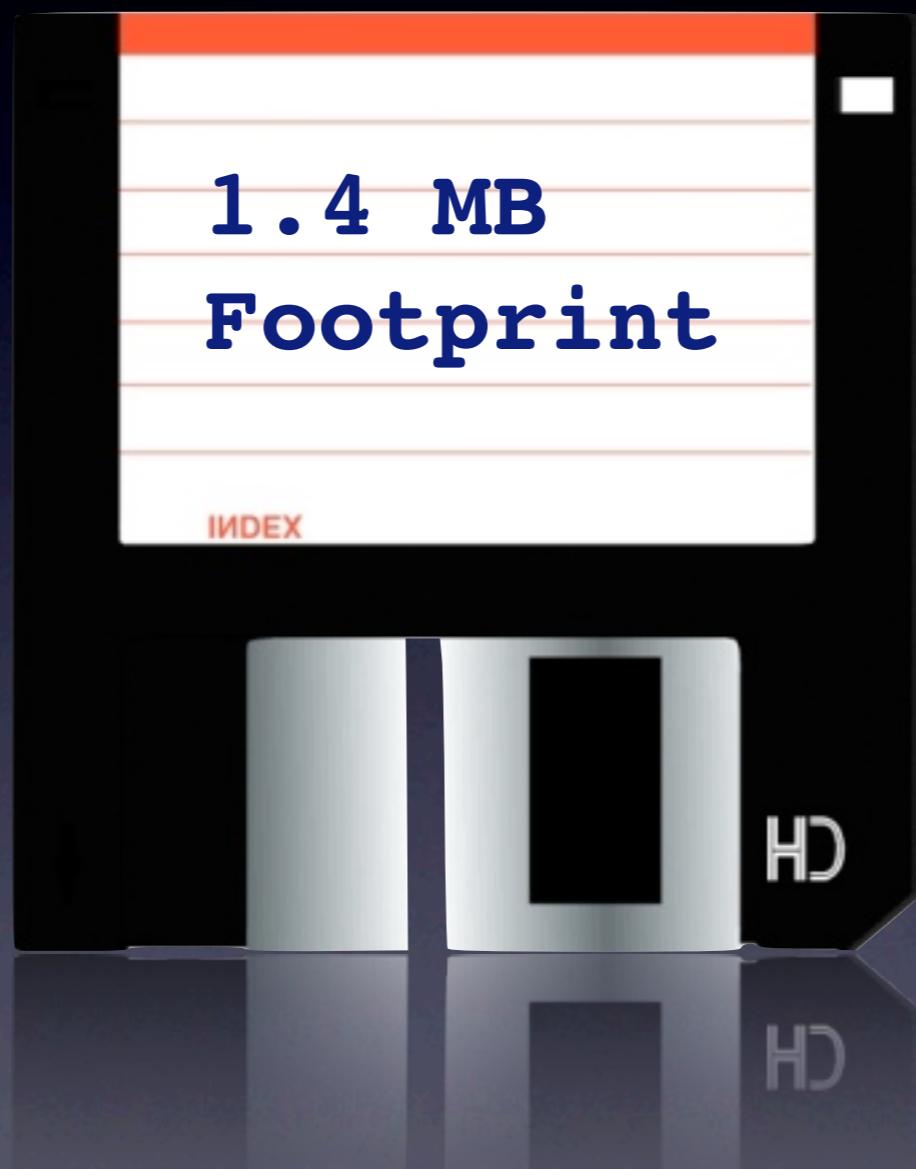

```
newTable["printJoe"] = function() print("Joe") end
```

Tons of Features/APIs

- Content scaling
- Multi-resolution images
- Simulator (instant refresh)
- Cloud services
- And more!

crate.rotation = 10
```

```
local physics = require( "physics" )
physics.start()

local sky = display.newImage( "clouds.png" )

local ground = display.newImage( "ground.png" )
ground.x = 160
ground.y = 445

physics.addBody( ground, { friction=0.5 } )
ground.bodyType = "static"

local crate = display.newImage( "crate.png" )
crate.x = 180
crate.y = 80
crate.rotation = 10
```

```
local physics = require( "physics" )
physics.start()

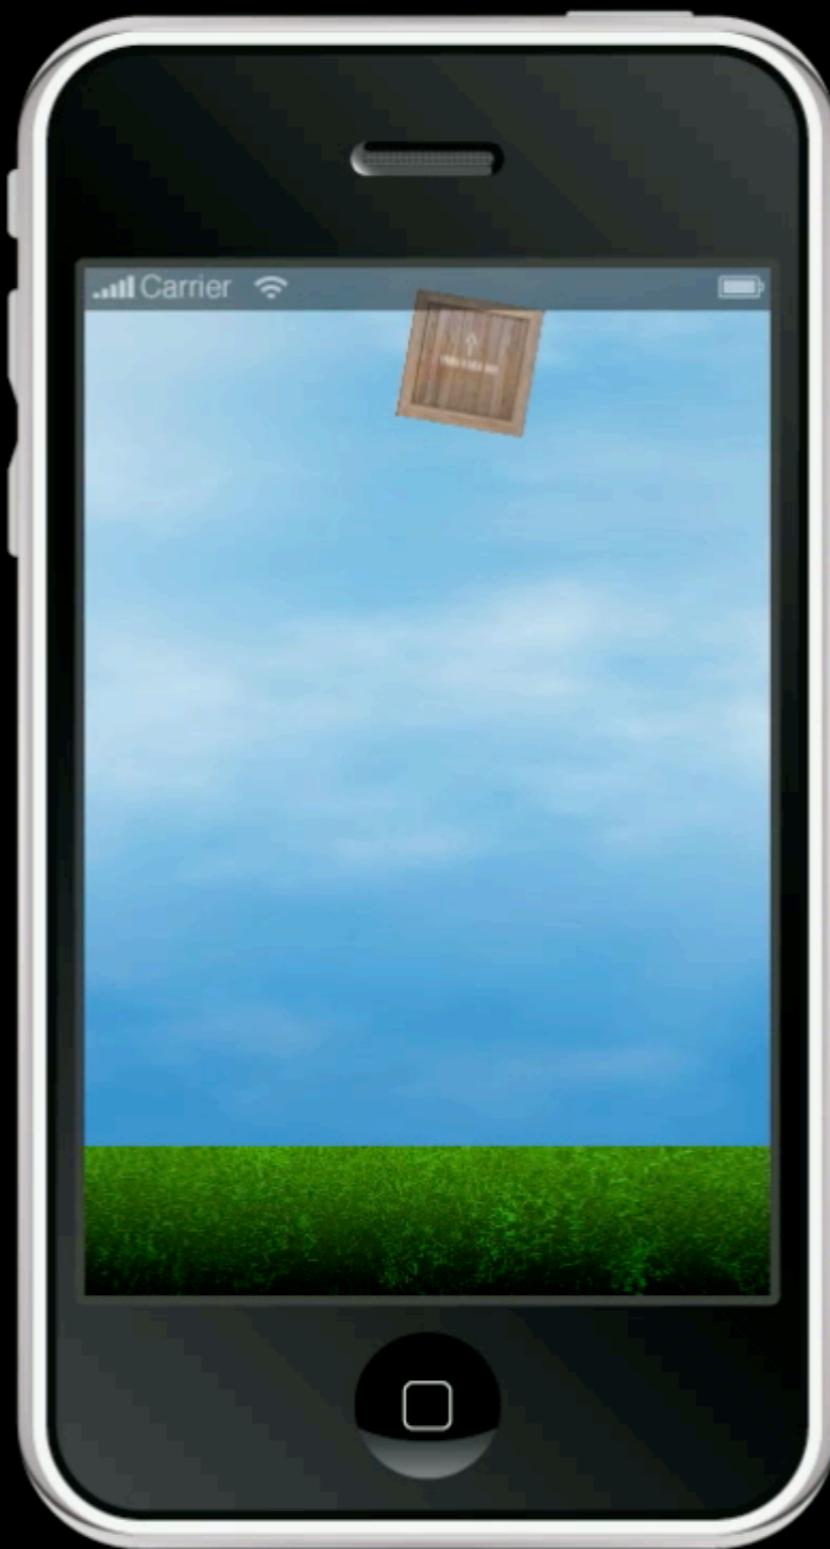

local sky = display.newImage( "clouds.png" )

local ground = display.newImage( "ground.png" )
ground.x = 160
ground.y = 445

physics.addBody( ground, { friction=0.5 } )
ground.bodyType = "static"

local crate = display.newImage( "crate.png" )
crate.x = 180
crate.y = 80
crate.rotation = 10

physics.addBody( crate, { density=2.0,
friction=0.5, bounce=0.3 } )
```

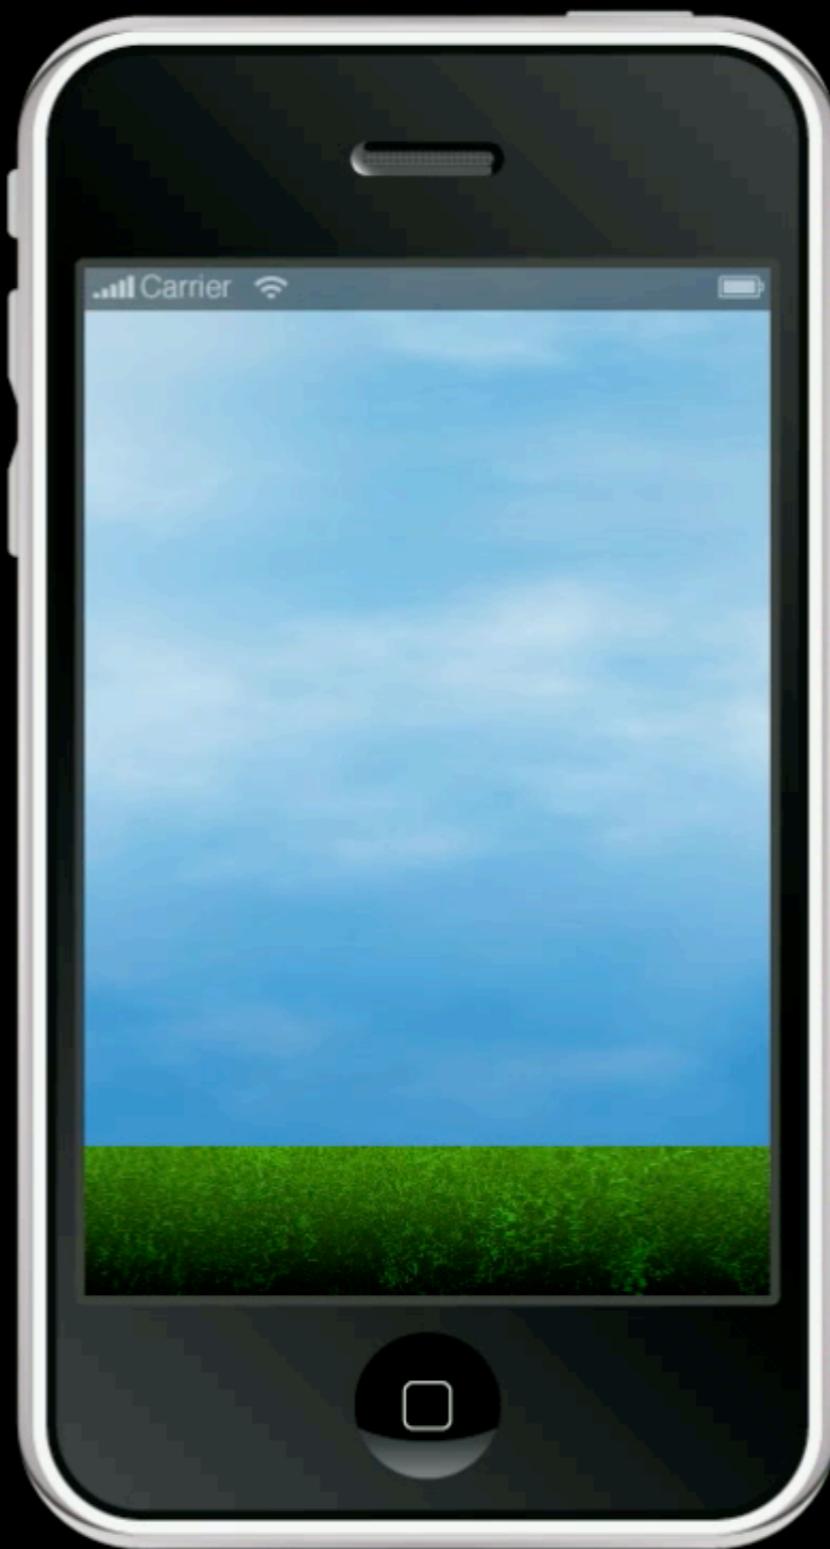

What if we want
lots of crates?

```
local crate = display.newImage( "crate.png" )
crate.x = 180
crate.y = -100
crate.rotation = 10
physics.addBody( crate, { density=2.0,
    friction=0.5, bounce=0.3 } )
```

```
local function spawnCrate()
    local crate = display.newImage( "crate.png" )
    crate.x = math.random( 320 )
    crate.y = -100
    crate.rotation = 10
    physics.addBody( crate, { density=2.0,
        friction=0.5, bounce=0.3 } )
end

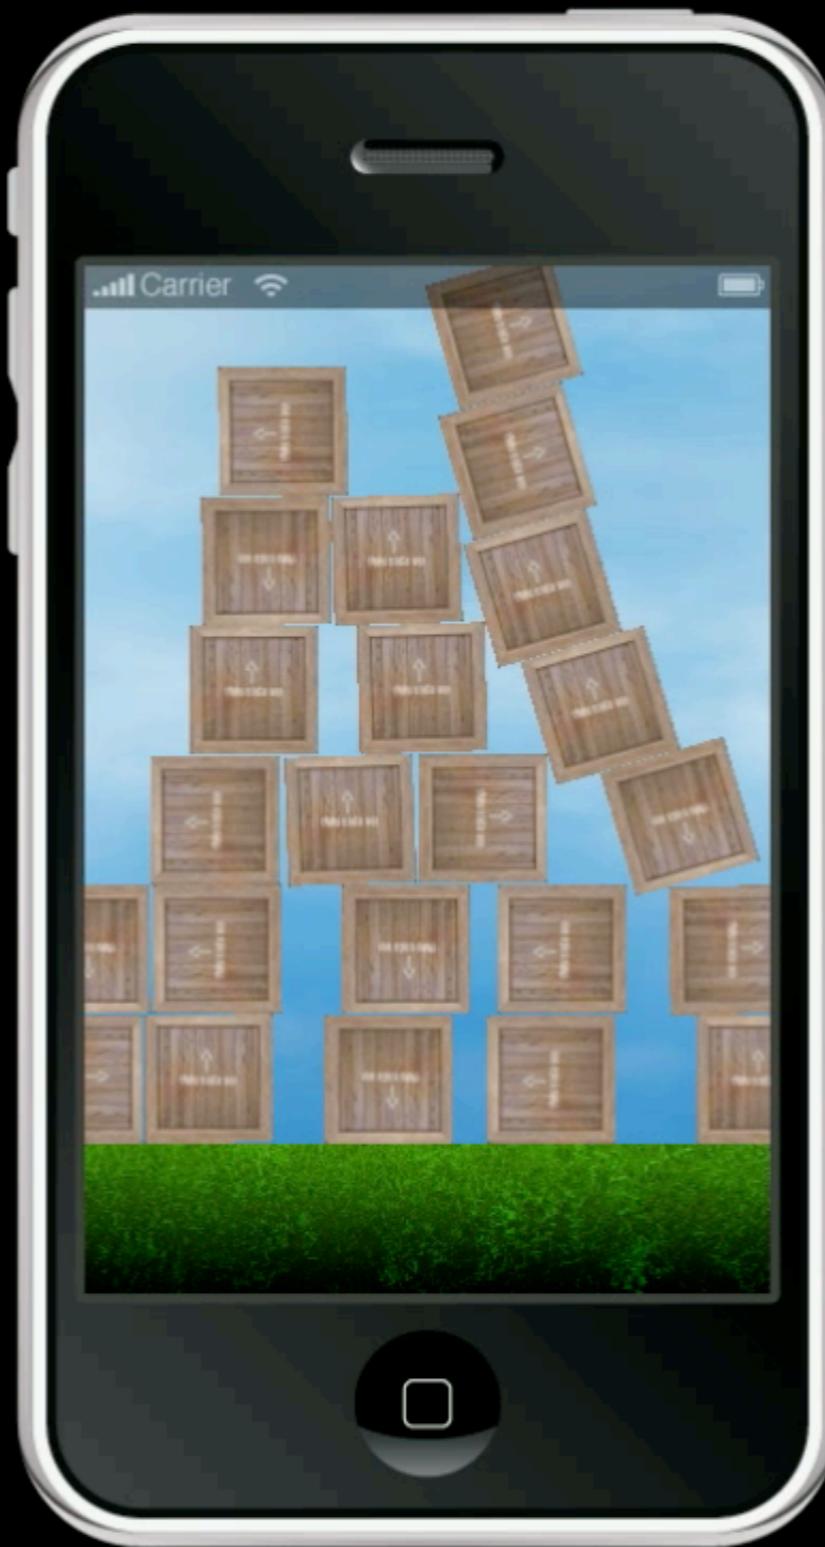

timer.performWithDelay( 500, spawnCrate, 50 )
```

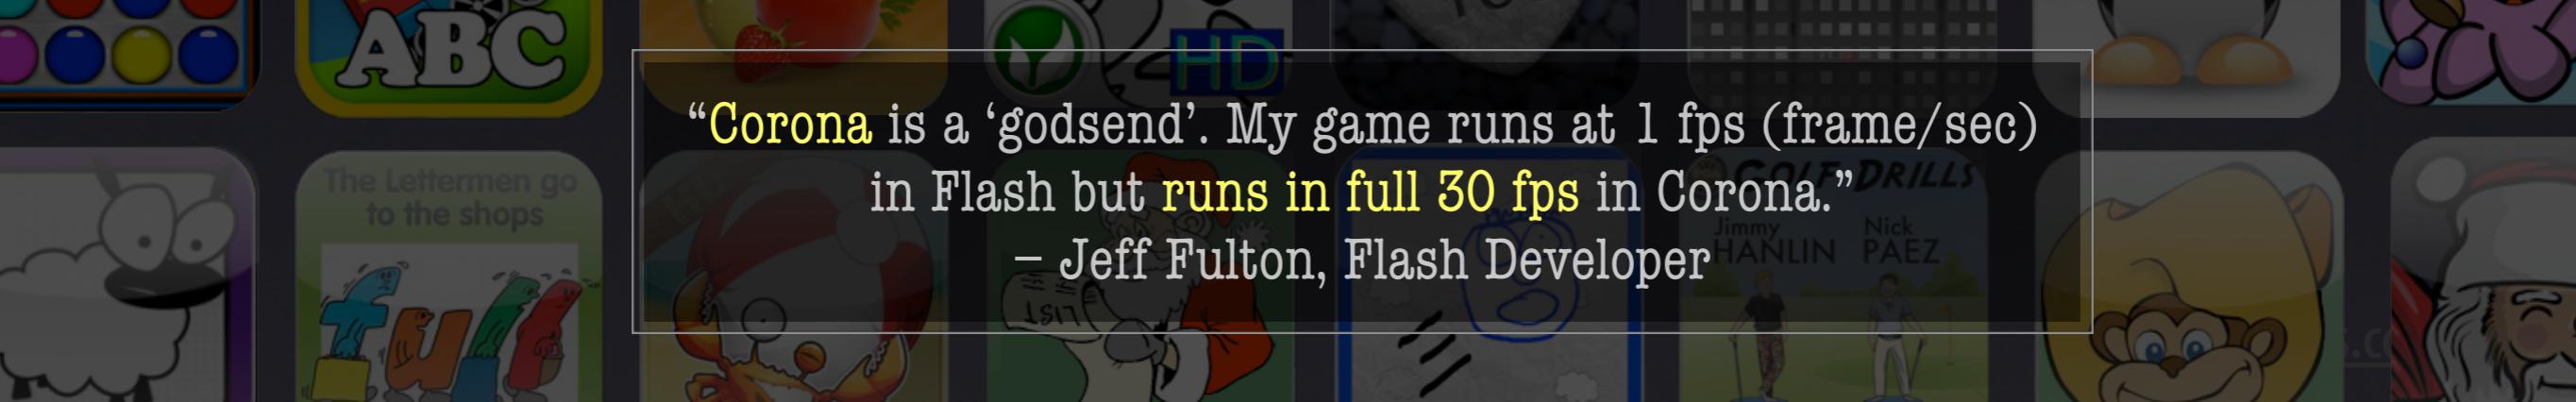

What if gravity was **up**
rather than down?

```
physics.setGravity( 0, 9.8 )
```

```
physics.setGravity( 0, -9.8 )
```

Take a Look at What's Possible

"Corona is a 'godsend'. My game runs at 1 fps (frame/sec) in Flash but runs in full 30 fps in Corona."
– Jeff Fulton, Flash Developer
